TOMUS LII—1988—52. KÖTET

Bárány, I., On the minimal ring containing the boundary of a convex body ..... 93—100

Берман, Д. Л., Об одном интерполяционном процессе Эрмита—фейера при уль трасферуческих узлах ..... 93—100

Bosbach, B., Lattice ordered binary systems ..... 257—289

Bosznay, A. P.—Garay, B. M., On a geometric problem concerning discs ..... 325—329

Бузаши, К.—Краус, Т., Описание скрещенных групповых алгебр над конечными полями ..... 291—302

Chajda, I., Examples of local uniformity of congruences ..... 81—84

Daróczy, Z.—Kátai, I., Interval filling sequences and additive functions ..... 337—347

Denecke, K., Varieties and quasivarieties, generated by two-element preprimal algebras, and their equivalences ..... 69—79

Dharmadhikari, N. S.—Singh, R. K., Compact and Fredholm composite multiplication operators ..... 437—441

Einmahl, J. H. J.—Ruymgaart, F. H.—Wellner, J. A., A characterization of weak convergence of weighted multivariate empirical processes ..... 191—205

Fakhruddin, S. M., On te category of *S*-posets ..... 85—92

Fan, P., A note on local spectra and multicyclic hyponormal operators ..... 443—446

Finet, C., Sur un théoreme de J. Gourgain ..... 171—178

Fried, K., Rare bases for finite intervals of integers ..... 303—305

Garay, B. M., *cf.* Bosznay, A. P. ..... 325—329

Grätzer, G.—Kelly, D., Addendum to "The lattice variety D∘D" 465

Haddock, J.—Krisztin, T.—Terjéki, J., Comparison theorems and convergence properties for functional differential equations with infinite delay ..... 399—414

Hsiang, W. H., Banach—Steinhaus theorems of locally convex spaces based on sequential equicontinuity and essentially uniform boundedness ..... 415—435

Huhn, A. P., On non-modular *n*-distributive lattices I. Lattices of convex sets ..... 35—45

Isidro, J. M., On the group of analytic automorphism of the unit ball of J^*-algebra ... 165—170

Карагулян, Г. А., О подсистемах сходимости произвольной ортонормированной системы ..... 373—386

Kátai, I., cf. Daróczy, Z. ..... 337—347

Keller, H.-D., Large deviations of the empirical characteristic function ..... 207—214

Kelly, D., cf. Grätzer, G. 465

Kilgore, T., A note on optimal interpolation with rational functions ..... 113—116

Kovačević, I., A note on D_p spaces ..... 331—336

Krasner, M., Abstract Galois theory and endotheory. II ..... 231—255

Краус, Т., cf. Бузаши, К. ..... 291—302

Kristóf, J., Commutative GW^*-algebras ..... 145—155

Krisztin, T., cf. Haddock, J.—Terjéki, J. ..... 399—414

Maeda, S.—Thakare, N. K.—Manjarekar, C. S., Abstract spectral theory. II. Minimal characters and minimal spectrums of multiplicative lattices ..... 53—67
Makarov, N. G., One-dimensional perturbations of singular unitary operators ..... 459—463
Manjarekar, C. S., cf. Maeda, S.—Thakare, N. K. ..... 53—67
Meldrum, J. D. P., Group theoretic results in Clifford semigroups ..... 3—19
Móricz, F.—Szalay, I., Absolute summability of double orthogonal series ..... 349—371
Pondělíček, B., Principal tolerance trivial commutative semigroups ..... 29—33
Pulmannová, S., Free product of ortholattices ..... 47—52
Pták, V.—Vrbová, P., Operators of Toeplitz and Hankel type ..... 117—140
Ruymgaart, F. H., cf. Einmahl, J. H. J.—Wellner, J. A. ..... 191—205
Schwarz, Š., Semigroups with a universally minimal left ideal ..... 21—28
Simon, L., On perturbations of boundary value problems for nonlinear elliptic equations on unbounded domains ..... 179—190
Singh, R. K., cf. Dharmadhikari, N. S. ..... 437—441
Szalay, I., cf. Móricz, F. ..... 349—371
Szűcs, J. M., Normalcy is a superfluous condition in the definition of G-finiteness ..... 141—144
Szyszkowski, I., The invariance principle for functionals of sums of martingale differences 157—163
Tateoka, J., On some inequalities for Walsh—Fourier series ..... 387—392
Terjéki, J., cf. Haddock, J.—Krisztin, T. ..... 399—414
Thakare, N. K., cf. Maeda, S.—Manjarekar, C. S. ..... 53—67
Veres, S., The asymptotic log likelihood function for a class of stationary processes .... 447—457
Vértesi, P., On the integral of fundamental polynomials of Lagrange interpolation. 393—398
Vrbová, P., cf. Pták, V. ..... 117—140
Wellner, J. A., cf. Einmahl, J. H. J.—Ruymgaart, F. H. ..... 191—205
Wells, C., Wreath product decomposition of categories, I. ..... 307—319
Wells, C., Wreath product decomposition of categories, II. ..... 321—324

Bibliographie

R. H. Abraham—C. D. Shaw, Dynamics. — A. N. Andrianov, Quadratic Forms and Hecke Operators. — M. Berger, Geometry I—II. — T. Beth—D. Jungnickel—H. Lenz, Design Theory. — B. Bollobás, Combinatorics. — Detection of Changes in Random Processes. — D. Braess, Nonlinear Approximation Theory. — W. Dittrich—M. Reuter, Selected Topics in Gauge Theories. — B. Eckman, Selecta. — A. T. Fomenko—D. B. Fuchs—V. L. Gutemacher, Homotopic Topology. — G. K. Francis, A Topological Picturebook. — F. R. Gantmacher, Matrizentheorie. — M. B. Green—J. H. Schwarz—E. Witten, Superstring Theory, Vol. 1—2. — E. Hairer—S. P. Norsett—G. Wanner, Solving Ordinary Differential Equations I. — A. Jones—A. Gray—R. Hutton, Manifolds and Mechanics. — H. Kocak, Differential and Difference Equations through Computer Experiments. — J. L. Koszul, Lectures on Fibre Bundles and Differential Geometry. — J. P. La Salle, The Stability and Control of Discrete Processes. — T. Matolcsi, A Concept of Mathematical Physics. — K. Murota, Systems Analysis by Graphs and Matroids, Structural Solvability and Controllability. — S. Pokorski, Gauge Field Theories. — G. Pólya, The Pólya Picture Album: Encounters of a Mathematician. — L. Aach, A Guide to Statistical Methods

and to the Pertinent Literature. — R. I. Soare, Recursive Enumerable Sets and Degrees. — R. J. Trudeau, The Non-Euclidean Revolution. — J. Wolka, Partial Differential Equations. — H. P. Yap, Some Topics in Graph Theory..... 215—230

Amorphous Polymers and Non-Newtonian Fluids. — Automata, Languages and Programming. — E. Behrends, Maß und Integrations theory. — B. Benninghofen—S. Kemmerich—M. M. Richter, Systems of Reductions. — J. Bolyai, Appendix, The Theory of Space. — I. Borg—J. Lingoes, Multidimensional Similarity Structure Analysis. — N. Bourbaki, Topological Vector Spaces. — N. P. Chapman, *LR* Parsing, Theory and Practice. — A. A. Dezin, Partial Differential Equations. — Differential Geometry. — Differential Geometry and Differential Equations. — Z. Ditzian—V. Totik, Moduli of Smoothness. — Functional Analysis II. — J. Grasman, Asymptotic Methods for Relaxation Oscillations and Applications. — Hydrodinamic Behavior and Interacting Particle Systems. — I. M. James, Topological and Uniform Spaces. — J. Lindenstrauss—V. D. Millman, Geometrical Aspects of Functional Analysis. — M. S. Livšic—L. L. Waksman, Commuting Nonselfadjoint Operators in Hilbert Space. — Mathematical Ecology. — V. A. Marchenko, Sturm—Liouville Operators and Applications. — J. M. Montesinos, Classical Tessalations and Three Manifolds. V. V. Nikulin—I. R. Shafarevich, Geometries and Groups. — D. H. Pitt—A. Poigné—D. E. Rydehehrd, Category Theory and Computer Science. — W. Purkert—H. J. Ilgauds, Georg Cantor. — H. Riesel, Prime Numbers and Computer Methods for Factorization. — K. P. Rybakowski, The Homotopy Index and Partial Differential Equations. — M. Shiota, Nash Manifolds. — Trends, Techniques, and Problems in Theoretical Computer Science. — W. Van Assche, Asymptotics for Orthogonal Polynomials. — J. Weidmann, Spectral Theory of Ordinary Differential Operators. — M. V. Zili, Mathematical Models for the Semantics of Parallelism. ..... 467—483

Livres recus par la redaction ..... 485—489
